Dear Ms Elodie Pottier,

I have always had a soft corner for networking and cybersecurity when it comes to the field of IT. I would be honoured to blend my genuine passion with my professional experience by being an intern at LINKBYNET. Your way of perceiving the industry has really impressed me as you are one of the few companies which take into consideration the well-being of their employees and help them to become a better version of themselves.

I am Henusha Rajaram, currently pursuing my Computer Science bachelor's degree at SUPINFO International University. I would greatly appreciate the opportunity to have an internship in your organisation where I will be coached and mentored to fulfil my full potential, where my skills, knowledge and ideas will be refined.

What, specifically, would I bring to your team?

Passionate with an optimistic mindset who can adapt

Friends and acquaintances all testify that I relate to people easily and that I adapt quickly to new surroundings and as LINKBYNET already stands for a collaborative environment, this will encourage me to build a healthy relationship with my co-workers by bridging the communication gap. This will boost my confidence and push me to embark on new adventures which will broaden my horizons. Another aspect will be critical thinking which has always helped me to have a clear judgement on an issue, and to pose creative solution to challenges.

Technical Expertise

I believe I have the core knowledge of System and Network Fundamentals as I have been trained since last year by being assigned many projects related to Security Basics and Server Systems. This taught me about the practical part of an IT Infrastructure varying from the interaction between servers and clients, IP Addresses, routers, and firewalls on a network by manipulating both Linux and Windows. This points out the fact that I am sharp when it comes to the configuration of DHCP and DNS, Web Application and Storage technologies and have a good grasp of command line tools and protocols. Besides, I have a good comprehension of Database Management and Administration.

I firmly believe that I possess the qualities, the passion, and the drive that make me the ideal candidate and would be thrilled to learn more about your goals and needs, and share what I could offer.

Thank you for taking the time to review my resume.

I hope to hear from you soon.

Sincerely,
Rajaram Henusha
